Synthetic Turf Partnership Leads to Greater Field Performance

Total system performance approach leads to market share gains for ProGrass

FOR IMMEDIATE RELEASE: Pittsburgh, Pennsylvania

Near the end of 2010, one of the North American synthetic turf industry leaders, ProGrass, and manufacturer ACT Global Sports decided to form a strategic partnership. This conglomerate of synthetic turf forces pulled together to form a partnership of research, development, manufacturing, design, construction, installation and maintenance to provide a complete performance package of world class synthetic turf services.

ProGrass Synthetic Turf Systems and ACT Global have set new standards of excellence in the turf industry. Together they have made their mark across the nation one excellent sports field at a time. The Washington Wild Things professional baseball field was featured on Yahoo Sports, and a multi-field project for Polk County, Florida highlight the top

quality you can expect from these two synthetic turf industry leaders.

The ProGrass installation methods match the sport performance and durable quality approach that you would expect through a FIFA Preferred Producer for Football Turf such as ACT Global. These features have proven results based upon natural grass benchmarks in the areas of shock absorption, foot stability, rotational traction, skin abrasion and ball behavior. These performance systems are installed and maintained to last well over eight years of continuous use.

To further strengthen their partnership in offering the best solutions in 2012, ProGrass will soon announce a new line of artificial turf systems for top professional stadia. Pro Grass LLC is headquartered in Pittsburgh, Pennsylvania with sales locations throughout the United States. It is a leader in the synthetic turf industry with bonding capacity over \$50 million. ACT Global Sports is based in Austin, Texas with its ISO 9001 Quality Certified manufacturing location in Calhoun, Georgia. ACT Global also has three international production facilities and offices in The Netherlands, Cyprus, United Kingdom, China, Malaysia, Poland, Thailand and France.
