

Installation of turf will greatly enhance our ability to meet the needs of our student body," said Hiram Athletic Director Tom Mulligan. "Currently, the football field is only used on five dates a year. With turf, we will be able to provide additional opportunities for club, intramural and free play competition."

FIELD OF DREAMS: TERRIERS' NEW TURF

In addition to the locker room renovation, college officials announced that the Charles A. Henry athletic field will be enhanced with the installation of a synthetic turf field and lighting. Work will begin in May and will be completed in July.

"Installation of turf will greatly enhance our ability to meet the needs of our student body," said Hiram Athletic Director Tom Mulligan. "Currently, the football field is only used on five dates a year. With turf, we will be able to provide additional opportunities for club, intramural and free play competition. Additionally, the new surface will elevate the standing of our football venue to one of the most attractive in small college football."

ProGrass, a synthetic turf company out of Pittsburgh, has been selected to install the new surface. Hiram College graduate **Bobby Thomas '79** serves ProGrass as senior vice president of the company. The firm specializes in field installation and has successfully completed projects at the University of Akron (Infocision Stadium), Muskingum College, Aurora High School, Twinsburg High School and other projects throughout the country.

"Bobby worked very hard to earn our business as he is looking to help his alma mater," said Mulligan. "We did our homework and talked with many ProGrass customers. They were all satisfied with the work done on their campuses and at their schools."
