To Whom It May Concern,

You will find no better company to work with than ProGrass. They are good sales people whose product lives up to its sales claims. I am blown away by the quality of our field. I highly encourage you to come and take a look at our field and stadium. The turf is amazing. Go with nothing less than what we installed and you will be very happy. We did a mix of sand and rubber and it plays like real grass. I was concerned about this variable and it went perfectly. Trust these guys to get you the best product. I looked long and hard and visited many.
