November 15, 2007

To Whom it May Concern:

Ohio County Schools contracted with ProGrass to install artificial turf at Wheeling Island Stadium in the Spring of 2004. The primary reasons for selecting ProGrass were the product and service expectations.

The product has more than exceeded our expectations. Withstanding two Ohio River floods (within six months of installation), the field has shown great durability. Combine that with over 80 games and 80 practices in the fall season alone, the field has been a tremendous asset to the community.

The service has been tremendous. ProGrass has made many trips to Wheeling to service the field as well as train our staff on the treatment. ProGrass personnel were at the stadium before the water receded to advise and help with the cleanup and repair as necessary.

Installing ProGrass has been one of the most important decisions Ohio County Schools has made in the area of athletic facilities. It truly has become a community field.

I encourage anyone to call concerning the product and treatment we have received from ProGrass.

Sincerely,

Bernie Dolan
Athletic Director
